**CitriSolv™**  
*Solvent and Clearing Agent*

CitriSolv™ is a d-Limonene-based solvent and clearing agent that can be used as a safe alternative to xylene and ethyl acetate. It is soluble with absolute alcohol and will dissolve paraffin, glues, adhesives, and mounting media. CitriSolv provides for better tissue sections – it will not harden or shrink tissue. It dries slowly with no residue and enhances some stains. Use in manual or automatic tissue processor staining procedures in

histology/cytology applications that require xylene.

Item	Standard Size	Alternate Size	Decon Catalog #
CitriSolv™	1 G (3.8L)	4 x 1 G (3.8L)	1601
CitriSolv™	5 G (20L)	N/A	1603

**CitriSolv™ Hybrid**  
*Solvent and Clearing Agent*

CitriSolv™ Hybrid is a mixture of d-limonene and hydrocarbon material allowing for the reduction of orange aroma and an increase in flash point. Not classified as flammable.

**HydeAway®**

HydeAway® aldehyde decontamination management products effectively convert used aldehydes into non-hazardous material to ensure safety and to facilitate disposal. HydeAway® offers the highest neutralization ratio available and can be used for formaldehydes, formalin and gluteraldehydes. Crystalline HydeAway® turns aldehydes into a solid polymer at a 1:30 ratio and the liquid version turns aldehyde into a fluid suitable for sewer

system disposal at a 1:15 ratio. Tested via EPA methods and proven safe for drain or trash disposal.

**Inoculating Loops, Streakers and Needles**

Made of high quality, twisted nickel chromium wire, LeLoops and LeStreaks are re-usable making them more economical than disposable plastic loops. Loops slide smoothly across the agar

surface without tearing or gouging. The nichrome wire cools rapidly after flaming, saving time. Loops are available calibrated or non-calibrated. All calibrated loops are subjected to Evan's Blue dye test.

LeLoops come without holders, which are available separately. Holders are made of nickel-plated brass with well insulated handles.

LeStreak and LeStab are permanently attached to lightweight, insulated aluminum holders perfectly balanced for easy manipulation.

**SlideRite™**

**Cytology Fixative**

SlideRite™ is a highly concentrated, water-soluble spray that forms a lasting protective coating over all types of cytological smears. Many cytological specimens are fragile and degenerate quickly, therefore, an immediate fixation of the material to be studied is essential.
