SAFETY INFORMATION
ON
PHENAZINE pH TEST PAPERS/STRIPS

Phenazine test papers/strips are classified as articles under osha regulations. Phenazine test papers do not require formal material safety data sheets or certificates of analysis (under osha standard – “hazardous communications” – 29 cfr 1910.1200). They are safe for shipment by air, sea or ground transportation.

Our test papers consist of indicator dyes that have been impregnated into paper. These papers are to be used in vitro only and not to be used internally. The concentration of impregnated dye is small.

Phenazine test papers consist of stable, non-reactive materials. They are non-volatile and not radioactive. Phenazine test papers and their components do not contain latex, mercury, DEHP or lead. These papers can be discarded according to local environmental waste procedures and regulations.

Phenazine pH test papers have a shelf life of 3 years and should be stored in dry protected from sunlight.
