

Technical Data Sheet

- BRIEF DESCRIPTION -

Fisherbrand Hard Water Softener removes hard water minerals and residues from the water in your labwasher and laundry. These minerals and residues leave spots and streaks on your glassware and reduce the effectiveness of your detergent. Using this hard water softener will increase the power of your detergent and leave your glassware clean and residue free. Fisherbrand Hard Water Softener is phosphate free.

Fisherbrand Hard Water Softener is safe to use to remove soap scum on surfaces such as stainless steel porcelain, glass, chrome, marble, and formica.

Fisherbrand Hard Water Softener also increases the effectiveness of your laundry detergent by removing minerals which can trap dirt into the cloth fibers.

- USE PROTOCOL -

For labwasher use: add one or two tablespoons of hard water softener to your

main dispensing cup along with your regular detergent. For extra performance, sprinkle ¹/₄ cup of powder in the bottom of your dishwasher.

For laundry use: add ½ cup of powder along with regular laundry detergent. Additional powder may be used with very hard water, larger loads or extremely dirty laundry.

- ACTIVE INGREDIENTS -Sodium Carbonate

- PRECAUTIONARY STATEMENT -
