**DISINFECTANTS**

**Conflikt®**

*Ready-to-use Disinfectant Spray*

Conflikt® disinfects and cleans hard surfaces that may harbor viruses, bacteria, and fungi. Pre-diluted, stable solution of dual quaternary ammonium active ingredients is effective against TB, HIV-1, E-coli, and other pathogenic organisms. Conforms to OSHA’s Bloodborne Pathogens Standard. EPA registered.

---

**CiDecon®**

*Concentrated Phenolic Disinfectant*

CiDecon® is a concentrated germicidal cleaner for disinfecting surfaces in lab production areas and on process equipment. Diluted one ounce per gallon of water (1:128), CiDecon is effective against a wide range of pathogenic organisms including TB, HIV-1, bacteria, viruses, and fungi. Conforms to OSHA’s Bloodborne Pathogens Standard. EPA registered.

---

**LopHene®**

*Concentrated Phenolic Germicide for Rotational Disinfection*

LopHene® is used alone or used with CiDecon in a rotational disinfection program. LopHene is a concentrated low-pH germicidal cleaner for use in labs, production areas, and on process equipment. Diluted half ounce per gallon of water (1:256), LopHene is effective against a wide range of bacteria, viruses, and fungi, including TB and HIV-1. Conforms to OSHA’s Bloodborne Pathogens Standard. EPA registered.

---

**SporGon®**

*Sporicidal Disinfectant*

SporGon® is a ready-to-use peracetic acid/hydrogen peroxide-based high-level disinfectant and sterilant. Completely effective against spores as well as being tuberculocidal, bactericidal, virucidal and fungicidal. Used at room temperature (20° C), high-level disinfection is achieved in 15 minutes and sterilization is achieved in 3 hours. Has FDA 510K clearance and conforms to OSHA’s Bloodborne Pathogens Standard.

---

**Iradecon®**

*Ready-to-use Bleach Spray*

Iradecon® is a pre-diluted, stabilized bleach (sodium hypochlorite) solution used to disinfect hard surfaces in labs and production areas. This ready-to-use solution is made up of 0.525% sodium hypochlorite (1:10 bleach solution) which is the strength recommended by CDC and OSHA for inactivating HIV, HBV and other pathogens. IRADECON is a safer and more convenient alternative to mixing your own bleach solutions since self made solutions are inherently unstable – often losing efficacy in 24 to 48hrs. Since IRADECON is pre-mixed and stable there are no issues with efficacy or performance. Packaged in a ready-to-use 32oz. trigger spray bottle. Conforms to OSHA’s Bloodborne Pathogens Standard. EPA registered.

---

**BDD™**

*Concentrated Quaternary Ammonium Detergent Disinfectant*

BDD (Bacdown® Detergent Disinfectant) will safely and effectively clean and disinfect surfaces in labs, production areas, and process equipment. Diluted two ounces per gallon of water (1:64), BDD is bactericidal, virucidal, fungicidal, effective against HIV-1, HBV, and more. Conforms to OSHA’s Bloodborne Pathogens Standard. EPA registered.

---

**CiDecon® Wipes**

*Surface Disinfectant Wipes*

CiDecon® Wipes are hard surface disinfectant wipes that provide broad-spectrum efficacy against bacteria, fungi and viruses including HIV-1. Convenient canister dispenses 65 pre-moistened wipes (6” x 10.5”). Conforms to OSHA’s Bloodborne Pathogens Standard and is EPA registered.

---

**CiDecon® Plus Wipes**

*Surface Disinfectant Wipes*

CiDecon® Plus Wipes are pre-moistened hard surface disinfectant wipes for use on hard surfaces. CiDecon Plus Wipes, which come in a convenient “pop-up” canister, are economical, durable and display superior efficacy against a broad range of pathogenic organisms. Achieves hospital disinfection in 10 minutes and maintains continual residual bacteriostatic activity for up to 6 months (see label for details). FDA compliant for use on medical equipment and instruments. Conforms to OSHA’s Bloodborne Pathogens Standard. EPA registered.
