

Solvent and Clearing Agent

Technical Data Sheet

- BRIEF DESCRIPTION -

CitriSolv Hybrid is the same as the d-limonene based solvent CitriSolv but contains a mild, non-toxic, additive that enhances the flash point. The higher flash point results in classifying the spent CitriSolv Hybrid as non-hazardous waste. The CitriSolv Hybrid can be used as a safe alternative to xylene and ethyl acetate. It is soluble with absolute alcohol and will dissolve paraffin, glues, adhesives, and mounting media. It will not harden or shrink tissue. CitriSolv Hybrid is biodegradable, non-corrosive, low evaporation rate and combustible (flashpoint is 145 ° F). It does not contain benzene and has low levels of toxicity.

- USE PROTOCOL -

Use for manual or automatic tissue processor staining procedures in histology/cytology applications that require xylene.

- STORAGE AND DISPOSAL -

Store in original container with lid tightly sealed. Follow federal, state and local restrictions for disposal.

- PRECAUTIONARY STATEMENT - Keep out of reach of children.

Avoid contact with eyes, skin, and clothing. Avoid ingestion and inhalation. Empty

containers retain product residue and can be dangerous. Avoid contact with heat, sparks, or flame.

FIRST AID:

Eye Contact: Immediately flush eyes with plenty of water for at least fifteen minutes, occasionally lifting the upper and lower eyelids. Contact a physician.

Skin Contact: Flush skin with plenty of soap and water for at least fifteen minutes while removing contaminated clothing and shoes. Contact a physician if irritation develops or persists.

Ingestion: Do NOT induce vomiting. If victim is conscious and alert, give 2-4 cupfuls of milk or water. Never give anything by mouth to an unconscious person. Contact a physician immediately.

Inhalation: Remove from exposure to fresh air immediately. Contact a physician.

- PACKAGING -

1 Gallon (3.8 Liters) / 4 per case
