

Peroxigen ST

Sterile Hydrogen Peroxide Solution

Peroxigen ST is a sterile 6% (v/v) Hydrogen Peroxide solution made with Water-for-Injection (WFI). This ready-to-use solution can be used to clean surfaces and equipment found in cleanroom areas within pharmaceutical, biotechnology, and medical device facilities or anywhere the use of a sterile, hydrogen peroxide solution is required.

Peroxigen ST is filtered to 0.2 microns, bottled and double-bagged within a cleanroom. It is gamma-irradiated to a sterility assurance level (SAL) of 10^{-6} . Each lot is tested for sterility via USP 14-day sterility test. A QR code can be found on each case of **Peroxigen ST** which is linked to a copy of the lot specific document, which details QC, irradiation, and sterility for that particular lot.

INGREDIENTS

6% (v/v) Hydrogen Peroxide

94% (v/v) Water

Precautionary Statements
